The High Trust Model!

Link emotions to learning.....Integrate and Stimulate the social and academic brain.....Focus on movement, drama, big muscle involvement.....more oxygen expended that links emotions-culture-learning.....Create a learning environment that combines "safe with stimulating"Teach to their ability level and readiness..... Connect learning to the learner's culture, values, aspirations.....Teach to the "whole child"

.Dynamic questions to grow thinking to analysis, synthesis and evaluation!

....the more arff you give
yourself,...the more you can
give the students....
